

(May 2007)

"Jason flat out delivered as our Keynote Speaker. He had the draw to bring people into our conference, then delivered the value to the attendees. He is the first and only speaker I have meet who sincerely learned the needs of our attendees, customized his message to address those needs and then took the time to meet the majority of our people. Once on stage, he captivated and the audience with entertaining, usable and insightful information.

Without question, he has been one of the most valuable speakers we have ever worked with and knows how to deliver real value."
